
Homework

Due: 1 Nov

Homework

iKid

- build a "joke app"

Homework

iKid: UI

- support any device screen size
 - more fun with AutoLayout!**
- tab or toolbar:
 - **three "categories" of jokes**
 - **Good**
 - **Pun**
 - **Dad**
 - **(Feel free to make up your own taxonomy if you wish)**

Homework

iKid: UI

- each "category" should go to a simple page
 - **simple centered label containing the question**
 - **"next" button in the lower right to "flip" to next**
 - **single centered label containing the punchline**

Homework

Grading: 5 points

- call the repository "ikid"
- 2 points for AutoLayout functionality
- 2 points for having tab bar or toolbar w/segues
- 1 point for screen rotation

Extra credit: Show me your best jokes

- 1 point if I LOL, 2 points if I ROFLOL
- 2 points for a knock-knock joke that "flips" 4 times
- 1 point for jokes with images instead of text
